PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of experience in designing and developing scalable web applications using React.js, Fast API, and MySQL. Strong expertise in building RESTful APIs, optimizing backend performance, and creating responsive UI/UX designs. Proven ability to improve application efficiency and reduce response time. Currently expanding expertise in AWS cloud, Docker, and CI/CD pipelines to build production-ready systems.

TECHNICAL SKILLS

- Languages: Python, JavaScript
- Frontend: React.js, HTML5, CSS3, Tailwind CSS, Context API
- Backend: Fast API, RESTful APIs, JWT Authentication
- Databases: MySQL, PostgreSQL, SQLite Tools: Git, GitHub, Postman, VS Code
- Cloud & DevOps: AWS (EC2, S3 – Basics), Docker, CI/CD Pipelines
- Concepts: Data Structures, API Design, Debugging, System Design, Agile Methodology

PROFESSIONAL EXPERIENCE

Full Stack Developer | |CommScope | |Sep 2025 – Present

- Designed and developed scalable full-stack applications using React.js and Fast API, improving overall application performance by 25%
- Developed and optimized RESTful APIs to handle 1000+ records efficiently, ensuring reliable and high-performance data processing
- Built interactive and data-driven dashboards, enhancing user experience and usability
- Reduced API response time by 30% through query optimization and efficient backend architecture design
- Implemented reusable and modular React components, reducing development time by 20% and improving maintainability

- Integrated frontend and backend using Axios and API communication patterns, ensuring seamless data exchange
- Identified, debugged, and resolved critical production issues, significantly improving system stability and reliability
- Utilized Git-based version control and actively collaborated in Agile/Scrum development environments
- Tech Stack: Python, React.js, Fast API, MySQL, Git, CSS, DBeaver

Associate Software Engineer | | Intern | | Mediacreche | | Mar 2025 – Sep 2025

- Developed responsive and user-centric web interfaces using React.js and Tailwind CSS, ensuring cross-browser compatibility and enhanced user experience across multiple devices
- Integrated frontend applications with RESTful APIs, enabling efficient data flow and real-time updates
- Designed and implemented reusable and modular React components, improving code maintainability and reducing development time by ~20%
- Collaborated with backend teams to optimize API responses, improving data processing efficiency and overall application performance
- Identified, analyzed, and resolved bugs across frontend and backend systems, significantly enhancing application stability and reliability
- Utilized Git for version control and actively contributed in Agile-based team development workflows
- Tech Stack: React.js, Tailwind CSS, Python, PostgreSQL, Git

PROJECTS

Project Tracker System

- Designed and developed a full-stack project management system handling real-time task tracking for multiple users
- Built RESTful APIs using Fast API, improving backend performance by 30%
- Developed dynamic dashboards using React.js for data visualization
- Implemented advanced filtering and search features to improve user efficiency
- Optimized SQL queries reducing response time by 25%

EDUCATION

BTech || March 2023 || JNTU Anantapur

- Major: Electronics and communication Engineering
- CGPA:8.64

CERTIFICATION AND ACHIEVEMENTS

- Python certification || Hacker Rank
- Solve 100+ problems on Hacker Rank
- Gate Rank 2026 || 18620
- Star award || CommScope

LANGUAGES

- English – Professional Working Proficiency
- Telugu – Native
